

Login Page

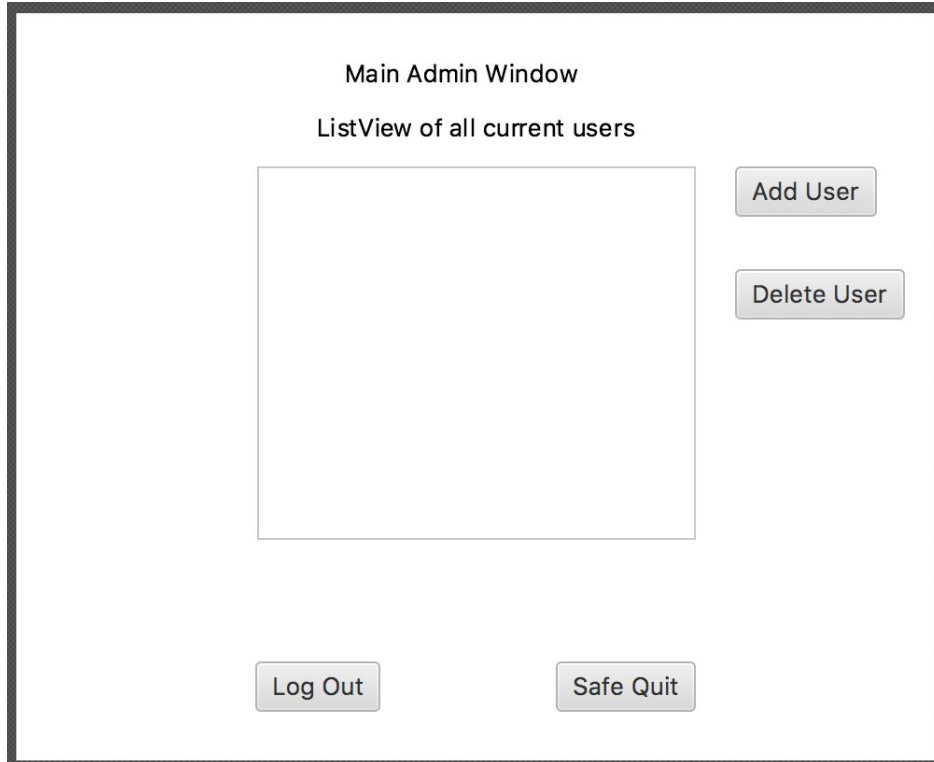

A login page form with a dark gray border. The form contains the following elements:

- A heading: "Enter User Name and Password"
- A text input field labeled "Username"
- A text input field labeled "Password"
- A "Login" button

- If user is in the system it opens up the user's albums page(slide 3)
- If admin (slide 2)

Main Admin

Buttons are all pretty self explanatory. Add user will allow you to add a user. Delete User will allow you to select a user from list view and delete

Log out will bring you back to Log in window (Slide 1).

Safe Quit will save and end the program

Log Out

Safe Quit

- Table view of albums
- Double click on album opens an album and goes to photos in album (slide 5)
- The search tag or search date will bring you to the search window (Slide 11).
- Make new album will prompt you with a dialog box to enter album name. It will then take you to photos in album window (slide 5).
- Delete and rename will allow you to select an album from table view and let you delete or rename the album(with a dialog box)
- Log out brings you to login page (slide 2)
- Safe quit saves and ends the program

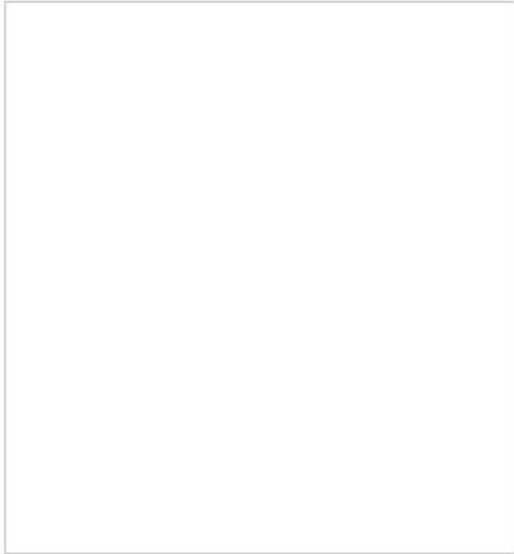

Photos in album

- Add Photo: will add photo that you select from some other folder
- Remove Photo: will move photo that you select from thumbnail view
- Move Photo: Will bring you to the move Photo window (slide 5)
- Add/Edit caption: Will have a pop-up dialog to add or edit a caption from a selected thumbnail
- Add/Remove Tag: will bring you to the Add/Remove tag window (slide 7 & 10)
- Edit tag types takes you to the edit tag type screen (slide 6)
- Back to My albums: Will bring you back to main user page (slide 3)
- Display picture: Will bring you to display picture window (slide 8)
- Slideshow: will bring you to slideshow window (slide 9)

Move Photo

Select a Destination Album

Move to Album

When you would like to move a photo, you will be brought to this screen. There will be a list of potential destination albums for the photo you have previously selected. Click on one in the list view, and then click the Move to Album button on the bottom. That will move the photo from one album to another

Edit Tag Types

Edit Tag Types

List view of tag types

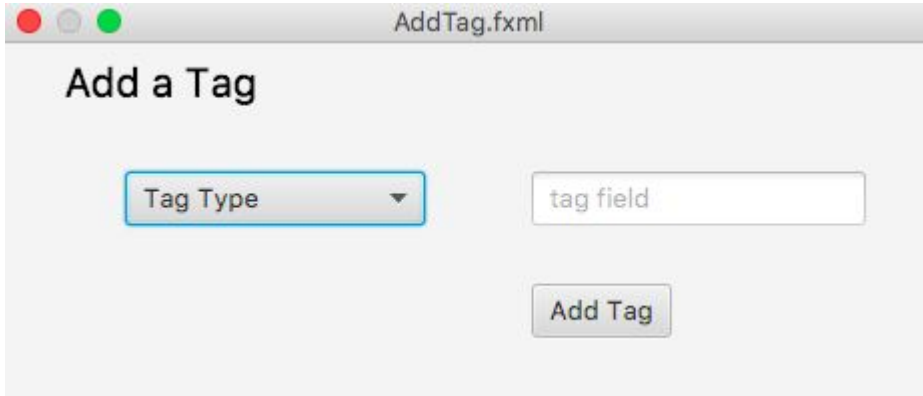

Remove Selected Tag Types

Enter new tag type

Add Type

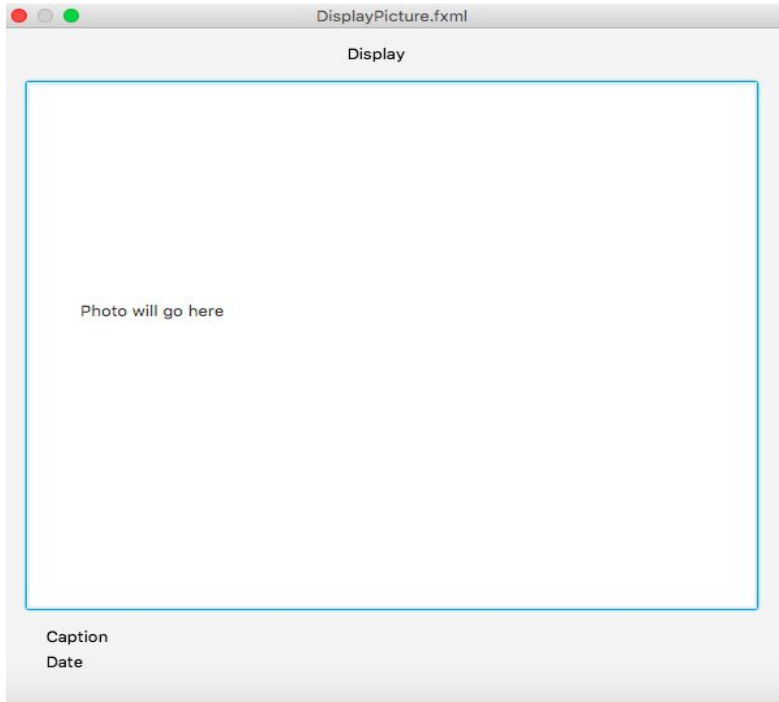

Edit Tag Types allows you to add a tag to your list of predetermined tags. If weather doesn't exist, you can add that type to your list of tag types. So now when you go to add a Photo, you can have a tag type of weather, and have a tag “snow”. You can also remove tag types selected in the list view.

Add Tag

A screenshot of a web application window titled 'AddTag.fxml'. The window has a light gray background and a title bar with red, yellow, and green window control buttons. Below the title bar, the text 'Add a Tag' is displayed. The main content area contains two input fields: a dropdown menu labeled 'Tag Type' with a downward arrow, and a text input field labeled 'tag field'. Below these fields is a button labeled 'Add Tag'.

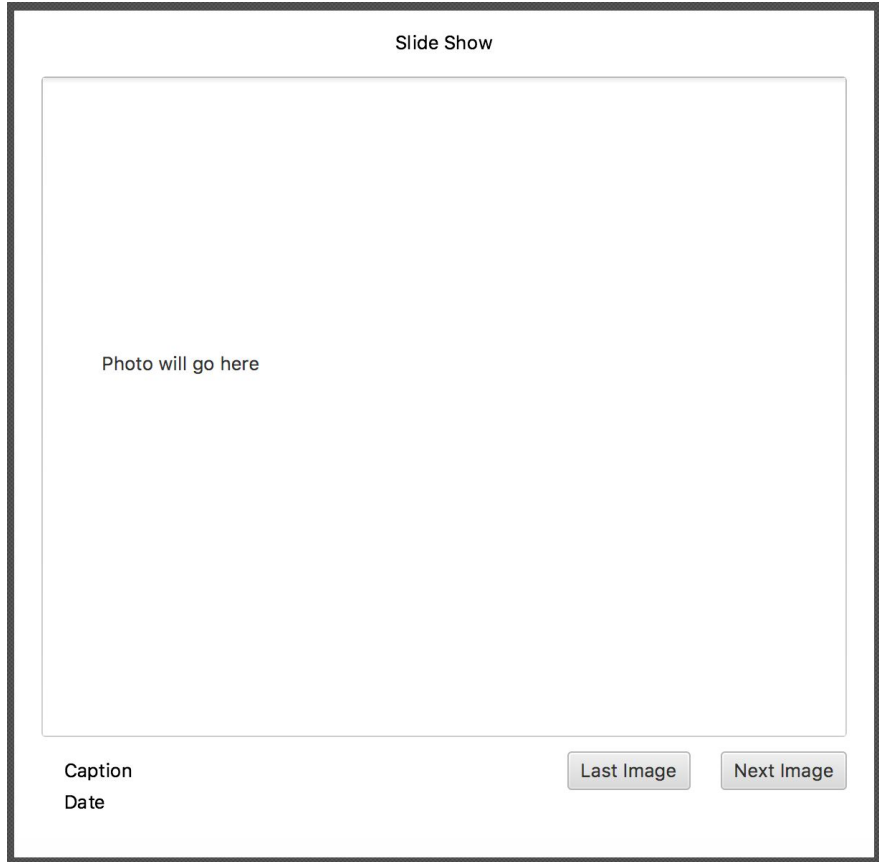

Add Tag will add a tag to your photo. First you will select a type of tag. Once type is selected, you will then enter a specific tag to be added to your photo. (Example, tag type will be location, while specific tag will be “NJ”).

Display Picture

Clicking on a thumbnail image will bring you to this window. From here, you will be able to view the selected thumbnail in a larger screen and be able to see the full photo which will include an optional caption and date

Slide Show

This will be the Slide show view. From here, you will be able to go through your photos in order of how they exist in the album. Next image will give you the next image in the album while last image will do the opposite. All photos will have an optional caption with a date.

Remove Tag Value

Remove a Tag

Select a Tag Type

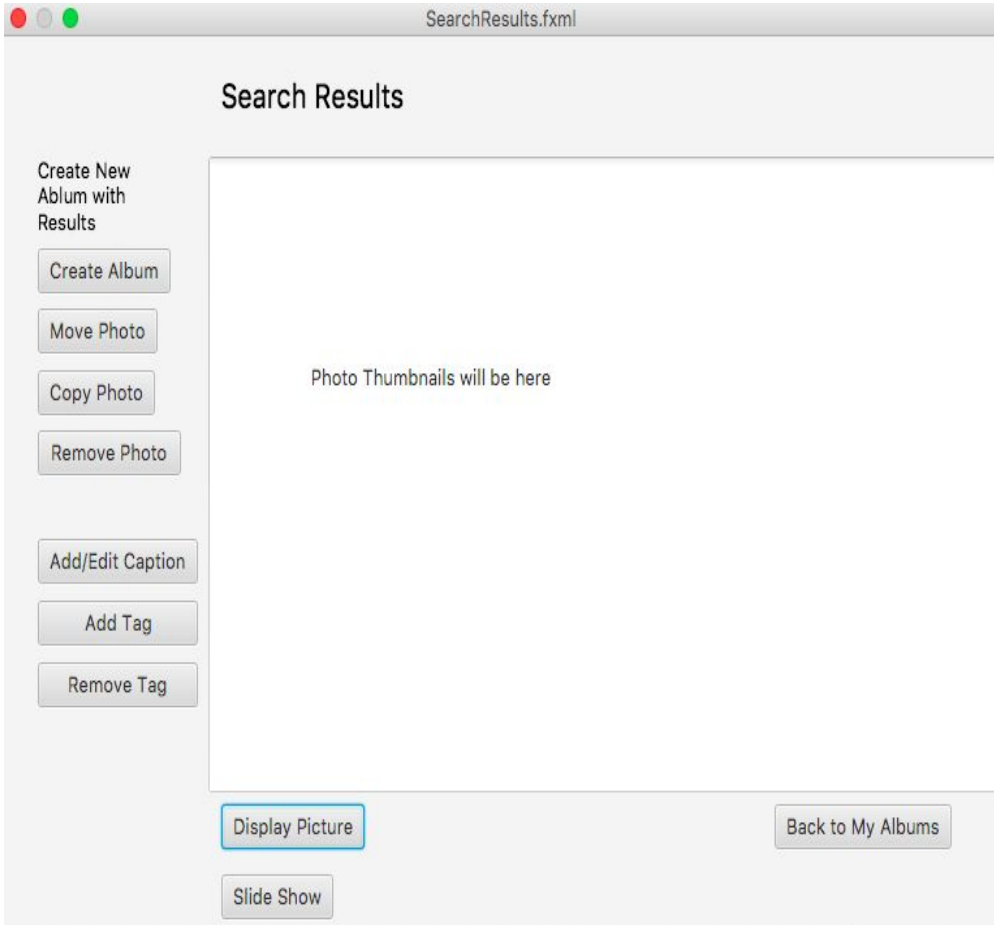

Tag Type ▼

List view of tags of the selected type

Remove Selected Tag/s

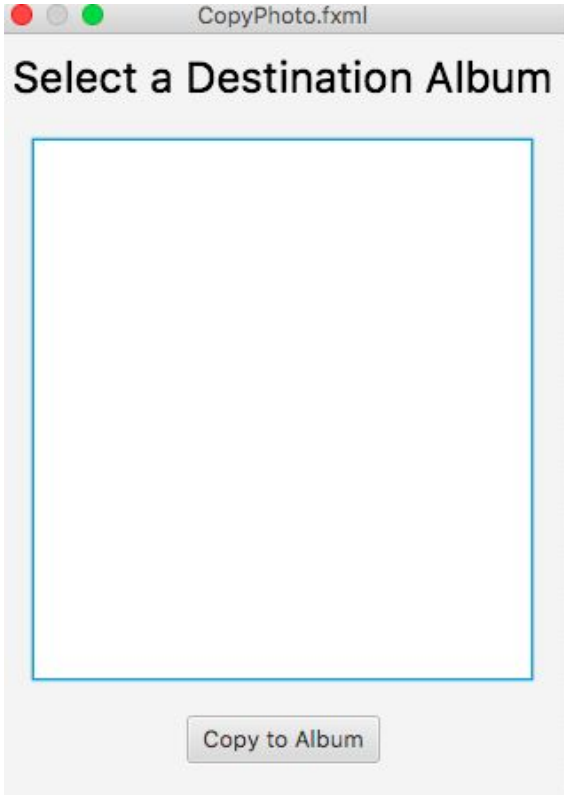

Select a Tag Type button will have drop down menu of tag types such as location, weather, etc. Selecting one of these will populate the listview with this type of tag. From there, you can select specific tags you would want to remove, such as “raining” for weather or “NYC” for Location. This will be removed with the “remove selected tags” button

Search Results

This has almost identical functionality as the Photos in album window (slide 5). Slight differences are that you can create a new album in here, which will bring you to Photos in album window. You also cannot add a photo because these will be results from a search

Copy Photo

Like move photo window, this window allows the user to copy an existing photo from one album to another
