Login Page

Enter User Name and Password

Username

Password

Login

- If user is in the system it opens up the user's albums page(slide 3)
- If admin (slide 2)

Main Admin

Main Admin Window

ListView of all current users

Add User

Delete User
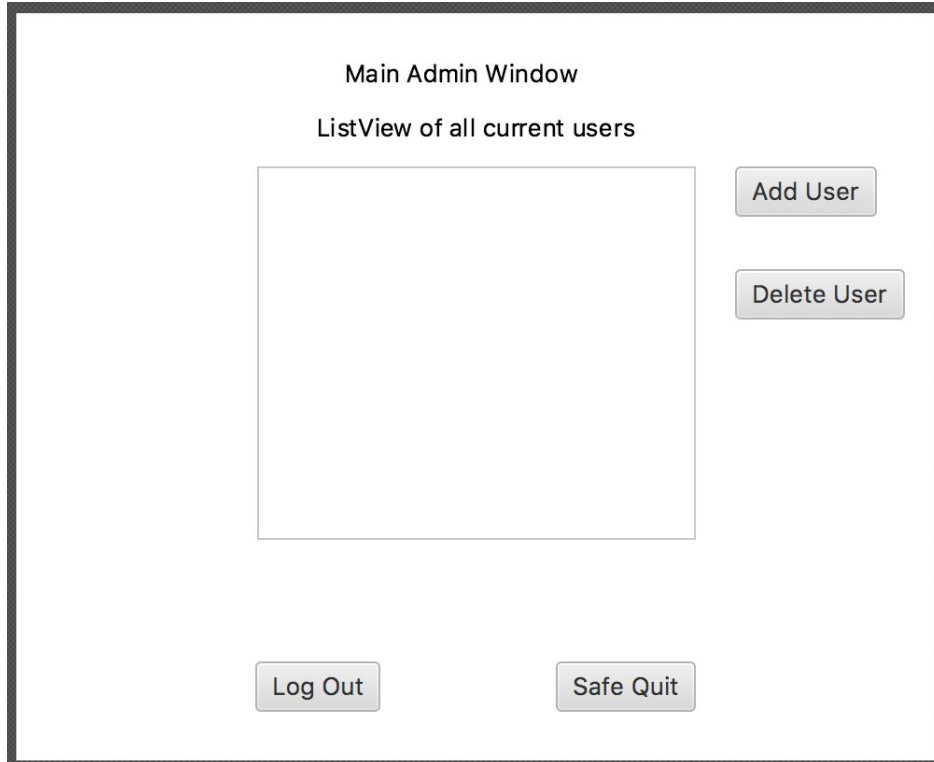

Log Out   Safe Quit

Buttons are all pretty self explanatory. Add user will allow you to add a user. Delete User will allow you to select a user from list view and delete

Log out will bring you back to Log in window (Slide 1).
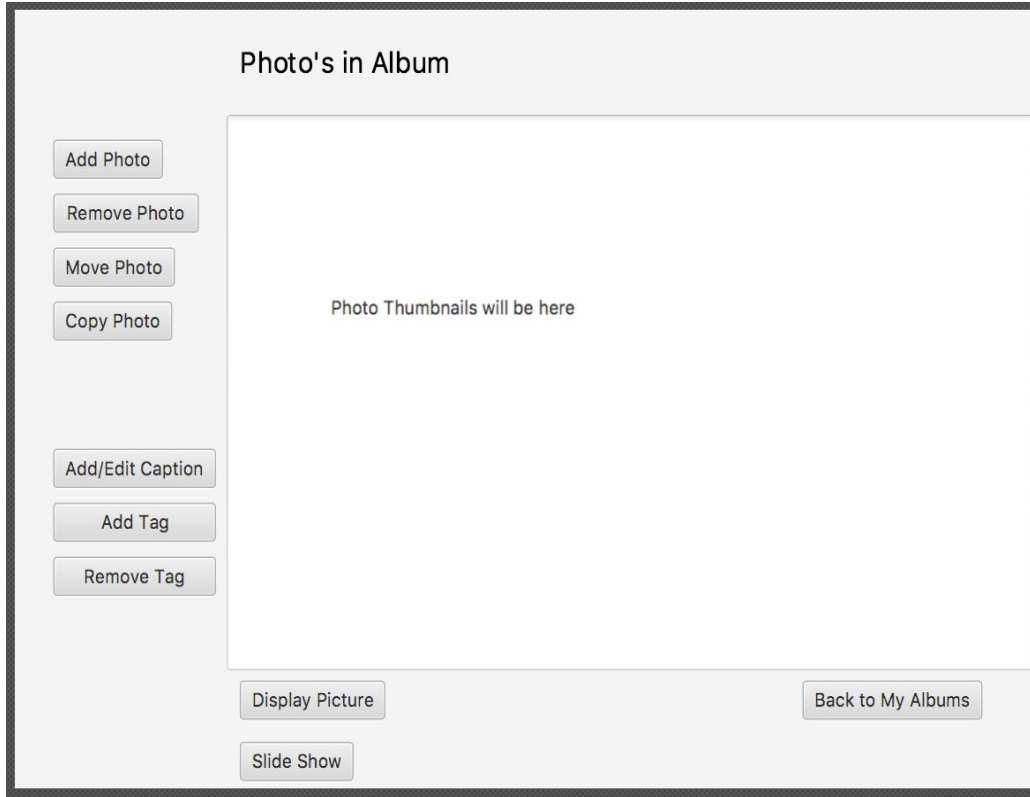

Safe Quit will save and end the program

User Album View

- Table view of albums
- Double click on album opens an album and goes to photos in album (slide 5)
- The search tag or search date will bring you to the search window (Slide 12).
- Make new album will prompt you with a dialog box to enter album name. It will then take you to photos in album window (slide 5).
- Delete and rename will allow you to select an album from table view and let you delete or rename the album
- Log out brings you to login page (slide 2)
- Safe quit saves and ends the program

-Back to My albums: Will bring you back to main user page (slide 3)
-Display picture: Will bring you to display picture window (slide 8)
-Slideshow: will bring you to slideshow window (slide 9)

Move Photo

Select a Destination Album
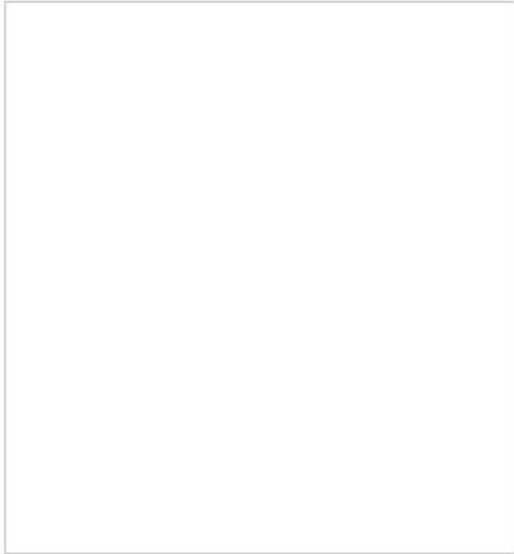

[Move to Album]

When you would like to move a photo, you will be brought to this screen. There will be a list of potential destination albums for the photo you have previously selected. Click on one in the list view, and then click the Move to Album button on the bottom. That will move the photo from one album to another
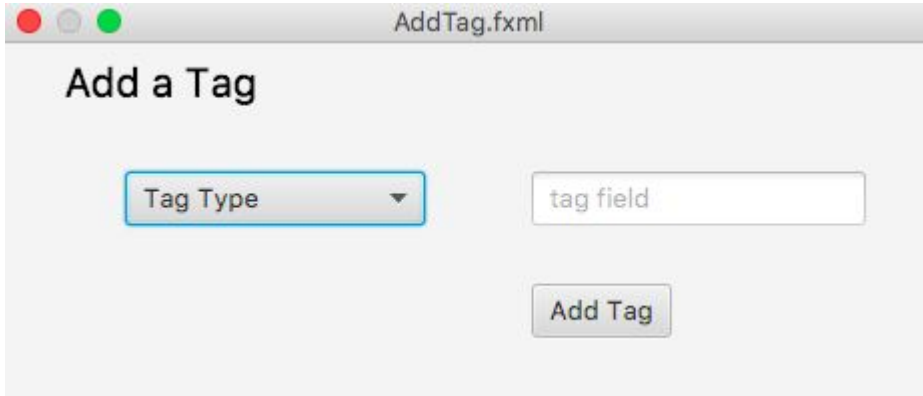

Add a Tag

Add a Tag allows you to add a tag to your list of predetermined tags. If weather doesn't exist, you can add that type to your list of tag types. So now when you go to add a Photo, you can have a tag type of weather, and have a tag "snow".
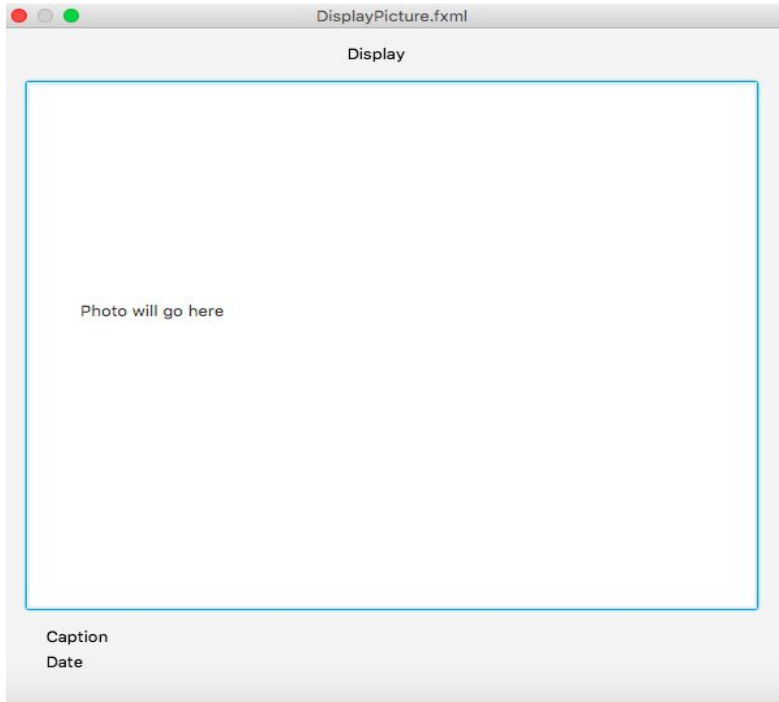

Add Tag

Add Tag will add a tag to your photo. First you will select a type of tag. Once type is selected, you will then enter a specific tag to be added to your photo. (Example, tag type will be loaction, while specific tag will be "NJ").
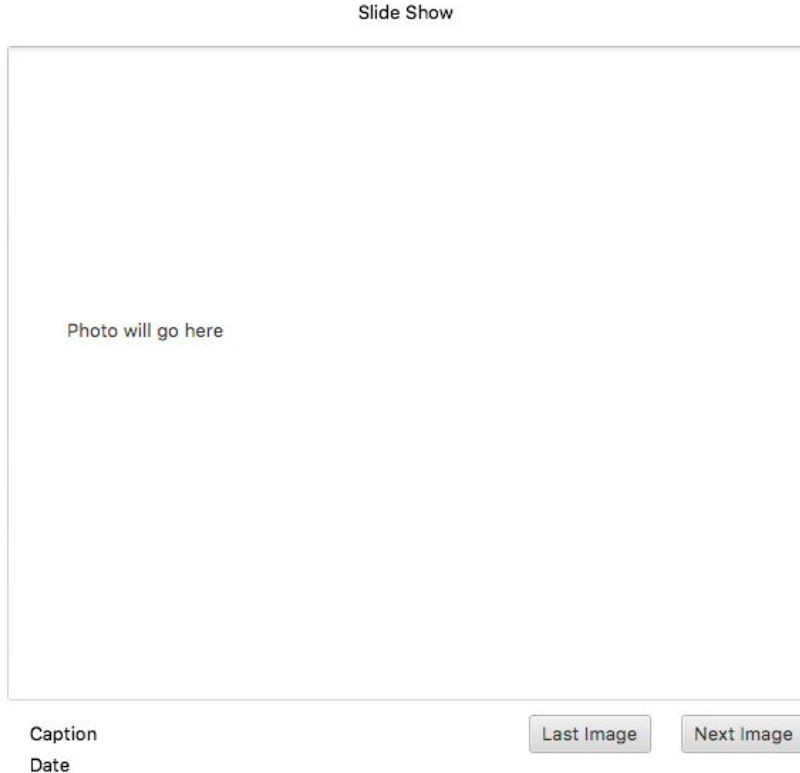

Display Picture

Clicking on a thumbnail image will bring you to this window. From here, you will be able to view the selected thumbnail in a larger screen and be able to see the full photo which will include an optional caption and date

Slide Show

Slide Show

Photo will go here

Caption
Date

Last Image   Next Image

This will be the Slide show view. From here, you will be able to go through your photos in order of how they exist in the album. Next image will give you the next image in the album while last image will do the opposite. All photos will have an optional caption with a date.

Remove Tag

Remove a Tag

Select a Tag Type

Tag Type ▼

List view of tags of the selected type

Remove Selected Tag/s

Select a Tag Type button will have drop down menu of tag types such as location, weather, etc. Selecting one of these will populate the listview with this type of tag. From there, you can select specific tags you would want to remove, such as "raining" for weather or "NYC" for Location. This will be removed with the "remove selected tags" button

Search Results
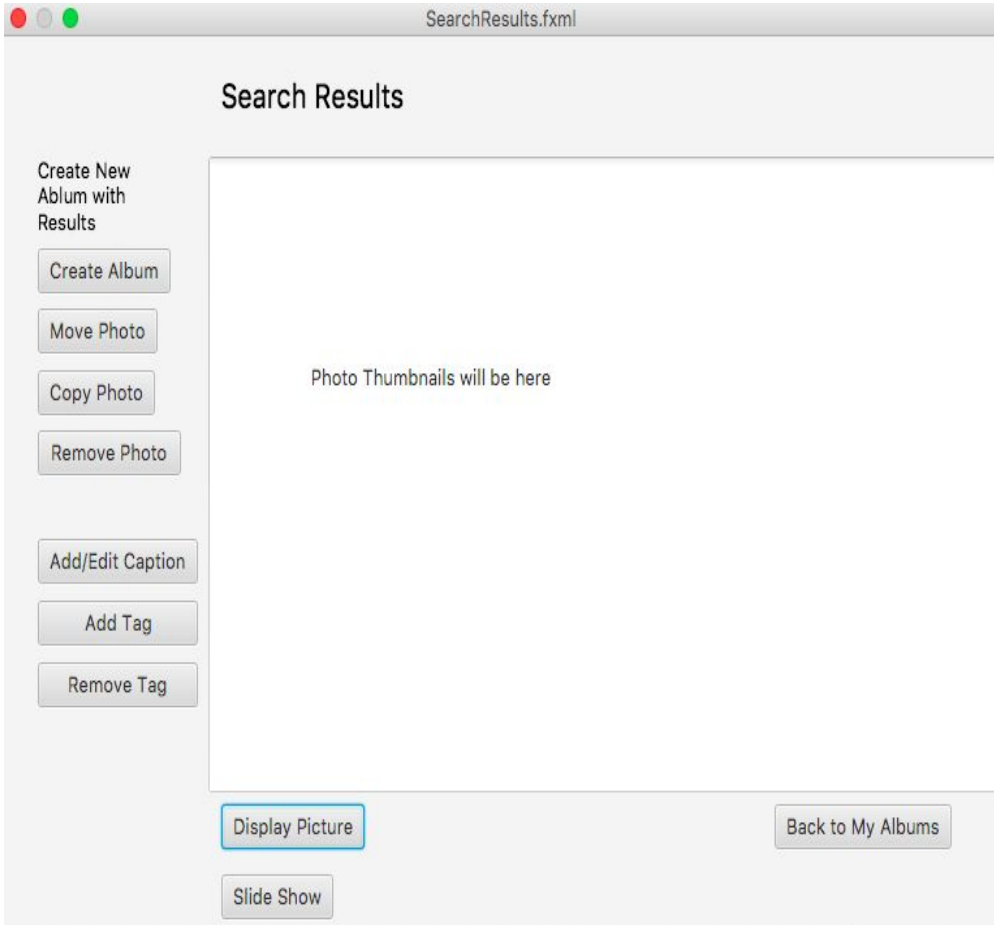

This has almost identical functionality as the Photos in album window (slide 5). Slight differences are that you can create a new album in here, which will bring you to Photos in album window. You also cannot add a photo because these will be results from a search

Copy Photo
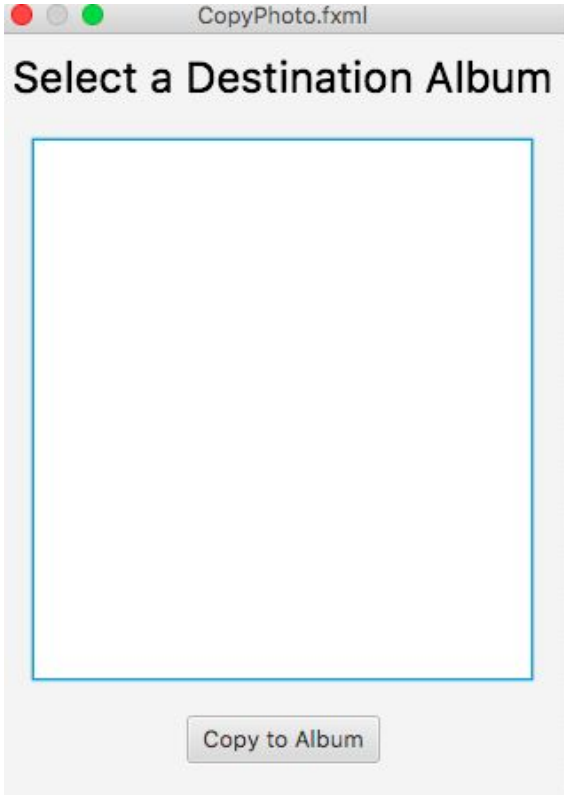

Like move photo window, this window allows the user to copy an existing photo from one album to another
